Re: Roebic K- 67 (Bacterial Drain & Trap Cleaner) and Roebic K-97 (Main Line Cleaner)

Dear Mr. Lawler:

This letter is to acknowledge receipt of the additional information concerning the products Roebic K- 67 (Bacterial Drain & Trap Cleaner) and Roebic K-97 (Main Line Cleaner). No product sold in the state for use in onsite sewage treatment and disposal systems may contain any substance in concentrations or amounts that would interfere with or prevent the successful operation of such system, or that would cause discharges from such systems to violate applicable water quality standards, section 381.0065(4)(m), Florida Statutes.

The staff has reviewed the information provided in the MSDS, 96-hr LC₅₀ toxicity test results, and laboratory results on volatile organic compounds for the product. The department has determined that the products, **Roebic K- 67 Bacterial Drain & Trap Cleaner and Roebic K-97 Main Line Cleaner**, are in compliance with s. 381.0065(4)(m), F.S. and has no objection to the use of the products in accordance with manufacturer's specifications. Please be advised that all rules pertaining to the use of the products shall be observed and that there shall be no advertising of the products as state approved.

Be advised that the department is not a testing agency and that this determination reflects only a review of the information submitted by you for compliance with Florida Statutes and Florida Administrative Code. The product evaluation does not investigate the validity of performance claims by manufacturers. For this reason, departmental acceptance must not be interpreted as certifying effectiveness, endorsing or recommending use of an additive. The Florida Department of Health also does not assume liability for any promise, guarantee or expectation from purchasing or using an additive. The department reserves the right to withdraw acceptance if product formulation or ingredients are modified after product evaluation by the department or subsequently found not to be in compliance with rule.

This letter of product compliance is limited to Department of Health jurisdictional circumstances as defined in Chapter 64E-6, Florida Administrative Code and Chapter 381.0065, Florida Statutes.

Sincerely,

Gerald R. Briggs, Chief
Bureau of Onsite Sewage Programs

Division of Environmental Health, Bureau of Onsite Sewage Programs

Net 32 fl. oz. (1 qt.) / 946 ml

ROEBIC®**K-97**

Main Line Cleaner

ROEBIC K-97 Main Line Cleaner contains millions of specialized waste degrading bacteria that effectively reduce sewage build-up in main waste lines. Main Line Cleaner digests sewage solids, fats, grease, and paper in city sewer lines, or septic systems.

DIRECTIONS

Shake well before use. Pour into toilet, flush once, allow to work 6-8 hours before flushing again.

Main Waste Line: Pour 8 ounces (1 cup) down toilet and flush. Repeat each day for four consecutive days. (4 applications per bottle) Use four times a year, or as needed.

For Low-flow Toilets: Pour 8 ounces (1 cup) down toilet and flush each day for four consecutive days. (4 applications per bottle) Apply twice a year, or as needed.

Septic Tank Use: Flush 4 ounces (1/2 cup) down toilet nearest septic tank weekly. (8 applications per bottle)

Non-Flammable

CAUTION: Harmful if taken internally.

Keep out of reach of children
